

# DAY ONE

Today we explored the art and mathematics of modular origami and textiles. Check out the iAM blog to read what the girls wrote today: <http://iamcamp.wp.txstate.edu/>

## TALK ABOUT IT

What is the difference between a polygon and a polyhedra?  
Explore more information about mathematical origami online:  
[http://mathigon.org/mathigon\\_org/origami/](http://mathigon.org/mathigon_org/origami/)

## BUILD UPON IT AT HOME

### ACTIVITY ONE

Use basic origami folding techniques to create your own origami bracelet from everyday paper:

Watch this video to see it in action: <https://www.youtube.com/watch?v=WV4hN9hVsyg>

## ACTIVITY TWO

Don't have knitting needles at home? Try "arm knitting" to create an awesome infinity scarf:

Watch this video to see it in action: [https://www.youtube.com/watch?v=7MMaw\\_TTxkY](https://www.youtube.com/watch?v=7MMaw_TTxkY)

### DON'T FORGET!

Bring your own shirt from home to screenprint (it can be new, old, patterned or solid, etc...it just needs to fit you).

### FRIENDS & FAMILY DAY

We invite friends and family to join us Friday at 11:30am to experience some of the fun ways we have been integrating art and mathematics. Parking is available one block away in the Edward Gary Garage (parking costs \$3/hour).
